👤 Profile Summary

Computer Science (AI & ML) student, Google Student Ambassador, and GeeksforGeeks Campus Mantri with expertise in computer vision, deep learning pipelines, and full-stack web applications. Skilled in PyTorch, Flask, and REST API design, with a focus on engineering AI-driven solutions for healthcare, agriculture, and civic safety.

⚙️ Technical Skills

Languages: Python, SQL, C++, Java, C
AI / ML & Vision: PyTorch, Deep Learning, ResNet-18, Image Segmentation, 3D/2D Medical Imaging
Web & Backend: Flask, Spring Boot, REST APIs, Maven, HTML/CSS, JavaScript
Developer Tools: Git, GitHub, VS Code

📁 Experience & Leadership

- Google Student Ambassador (GSA)** Jan 2026 – Present
Malnad College of Engineering Hassan, Karnataka
- Organized and facilitated campus technical workshops and developer learning initiatives on Google AI tools for 100+ students.
 - Served as primary campus liaison integrating AI tools and workflows into academic routines and student engineering projects.
- GeeksforGeeks Campus Mantri (Lead)** Jan 2026 – Present
Malnad College of Engineering Hassan, Karnataka
- Led campus technical community operations, spearheading developer events, coding contests, and hackathons.
 - Mentored peers on Data Structures, Algorithms, and technical interview preparation while promoting GeeksforGeeks resources.
- AI Research Intern** Jan 2026 – May 2026
Bharat Unnati Fellowship Remote
- Programmed custom convolutional pipelines in PyTorch for image processing, boosting preprocessing efficiency.
 - Optimized model inference latency across custom deep learning architectures for real-time deployment environments.

🔗 Key Projects

- Brain Disorder & Tumor Segmentation Engine** | *PyTorch, ResNet-18, Computer Vision*
- Engineered an AI diagnostic system processing 3D/2D MRI scans using ResNet-18 neural networks in PyTorch.
 - Implemented deep segmentation pipelines to accurately map affected anatomical regions and pinpoint infection sites.
- AI Precision Agriculture Engine (Raitha Mitra AI)** | *Python, Flask, Deep Learning*
- Developed a full-stack crop disease detection platform using image classification to evaluate uploaded leaf scans.
 - Integrated automated diagnostic heatmap generation and actionable disease prevention recommendations for farmers.
- Smart Transport & Logistics Hub (Krishi Sarathi)** | *Flask, Web Tech, REST APIs*
- Built a bilingual (Kannada/English) web portal connecting local farmers directly with commercial transporters and traders.
 - Streamlined agricultural logistics by facilitating real-time route matching and secure distribution tracking.
- Natural Disaster Detection & Mitigation System** | *Python, Emergency APIs, Web*
- Designed a disaster monitoring system utilizing live emergency APIs for real-time risk evaluation and SOS dispatch.

🎓 Education

- Malnad College of Engineering** Hassan, Karnataka
Bachelor of Engineering (B.E.) in Computer Science (AI & ML) Pursuing
- Vijaya Vittala College** Mysuru, Karnataka
Class XII (PUC) – 94% Completed
- Navodaya Junior College** Channarayapatna, Karnataka
Class X (SSLC) – 96% Completed

🏆 Achievements & Languages

Achievements: Participant, Smart India Hackathon (SIH 4.0), 2025; NCC A-Certificate Certified.
Languages: Kannada , English , Hindi
