Career Objective

Motivated Computer Science (AI & ML) student and Google Student Ambassador (2026) with a strong foundation in Artificial Intelligence, Deep Learning, and Web Technologies. Seeking to leverage technical skills in neural architectures and full-stack development to build innovative solutions in a dynamic environment.

Technical Skills

Programming: Python, C, SQL, Java, C++

AI & ML: Deep Learning, ResNet-18, Neural Networks, 3D/2D Brain Imaging, PyTorch

Web Development: Spring Boot, Flask, Maven, REST APIs

Automation & Tools: Git, GitHub, VS Code, Nutrition API, SOS/Disaster API

Academic & Technical Projects

Brain Disorder & Tumor Segmentation Engine

Engineered an AI diagnostic system utilizing MRI datasets and ResNet-18 architectures to perform 3D/2D brain imaging, pinpointing exact infection locations via deep learning and neural network analysis.

AI Precision Agriculture Engine

Developed a crop disease detection platform where users upload leaf images; system provides AI-driven diagnostic heatmaps, disease identification, and actionable prevention strategies.

Resort & Vehicle Booking System

Built a comprehensive hospitality and logistics management platform integrating real-time resort reservations, vehicle booking modules, and secure payment processing.

Natural Disaster Detection & Mitigation

Designed an intelligent monitoring system that detects local natural disasters, suggests emergency precautions, provides an SOS feature, and utilizes live API data for real-time reporting.

Smart Transport Platform for Farmers

Created a dual-language (Kannada/English) logistics hub connecting farmers directly with traders and transporters to streamline the secure distribution of agricultural goods.

AI Health & Nutrition Monitor

Engineered a daily routine tracker that manages user food habits and physical activity, integrated with a nutrition API to provide data-driven wellness exchanges.

Experience & Leadership

Google Student Ambassador (GSA)

Jan 2026 – Present

Organized campus learning initiatives and developer skill-building workshops (ID: 2941).

AI Research Intern (Bharat Unnati Fellowship)

Jan 2026 – May 2026

Programmed custom convolutional pipelines and optimized model inference processes.

Education

Malnad College of Engineering, Hassan

B.E. in Computer Science (AI & Machine Learning) - Pursuing

Vijaya Vittala College, Mysore

Class XII (PUC) - 94%

Navodaya Junior College, Channarayapatna

Class X (SSLC) - 96%

Achievements & Languages

Achievements: NCC A-Certificate Certified; Internal Finalist at Smart India Hackathon (SIH 4.0), 2025.

Languages:

- **Kannada:** Native/Bilingual
- **English:** Professional
- **Hindi:** Conversational
